

Action plan submitted by Nalan GÜVEN for Müşerref Mahmut Tinas Ortaokulu - 14.01.2023 @ 17:31:57

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › You have differentiated levels of filtering in your school which is an excellent policy. A good policy still needs to be regularly updated - is the system being regularly updated? How often are sites requested to be blocked or unblocked? Periodically evaluate whether it is fit for purpose and involve all stakeholders in this process. In addition, bear in mind that an educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.

Data protection

- › There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.

Software licensing

- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.

Policy

Acceptable Use Policy (AUP)

- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylevel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylevel.eu/group/community/school-policy) will provide helpful information.

Reporting and Incident-Handling

- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.
- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.
- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.

Staff policy

- › Ensure that all staff understand the school's regulations on use of personal mobile devices in the classroom; these should be clearly communicated in the School Policy. Monitor the effectiveness of the policy and ensure that it is adhered to. You can also advise your staff to read the fact sheet Using mobile phones at school (www.esafetylevel.eu/group/community/using-mobile-device-in-schools).

Pupil practice/behaviour

- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.
- › The curricula is too tight for pupils to shape school activities with what is going on in their daily lives. This is important as pupils will be more engaged and it also allows the teacher to recognise real life issues. Explore the possibilities of a flipped classroom and/or let them share information on their media usage and their problems as part of their homework.

School presence online

- › Having an official school page on some of the more widely used/popular social networking sites can be useful for parents, pupils and the broader public if you use it to publicise your actions and events. However, exercise care when setting this up to ensure that someone from the school has control over posts etc. Check the fact sheet on Schools on social networks (www.esafetylevel.eu/group/community/schools-on-social-networks) for further information.
- › While your school has an online presence, pupils cannot take part in shaping it. Explore if there could be a way to involve pupils, maybe as part of a digital council. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

Practice

Management of eSafety

- › In addition to a clear designation of responsibility to ensure that all necessary network security and user privacy checks are in place, it is essential that schools also have audit and procedural checks at regular intervals. Without this, a school will be leaving itself vulnerable. See our fact sheet on School Policy at www.esafetylevel.eu/group/community/school-policy.

Although there should always be an overall lead person on eSafety just as you have in your school, everybody in the school has a shared responsibility to secure any sensitive information used in their day to day professional duties. Even staff not directly involved in data handling should be made aware of the risks and threats and how to minimise problems. Use our fact sheet Acceptable Use Policy (www.esafetylevel.eu/group/community/acceptable-use-policy-aup-) to ensure that everyone plays their part in ensuring they are all the best and safest digital citizens they can be.

- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

eSafety in the curriculum

- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).
- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum.
- › eSafety needs to be embedded across the whole curriculum regardless of whether this is a statutory obligation in your country. There are several very good schemes of work freely available which will support this; for further information see the fact sheet Embedding eSafety in the curriculum at www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum.

Extra curricular activities

- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).
- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to info-insafe@eun.org.

Sources of support

- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › It is good practise that you provide information to teachers on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the [Essie Survey of ICT in schools](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can

upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
